PERFORMANCE SERIES

Key Product Features & Benefits

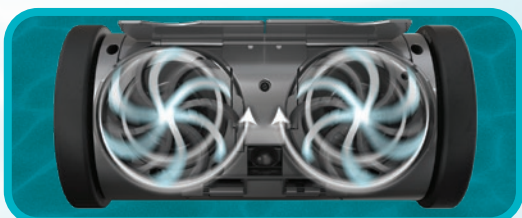

Exceptional Debris Handling

Cyclonic vacuum technology effortlessly eliminates fine silt and sand as well as larger, long debris with an innovative design that features unobstructed clearance to accommodate the different types of debris – directing it right into the filtration system.

High-Performance Wheels

Built to maneuver around any pool, the lightweight and rugged wheels feature durable all-purpose rubber tyres that provide maximum traction and are non-abrasive to protect all pool surfaces.

Active Scrubbing

The Baracuda® Wheela™ cleaner comes equipped with spinning brushes that agitate and remove fine, stuck-on debris from a pool's surface and directs particles towards the suction inlet, resulting in a spotless, floor-to-wall clean.

Dynamic Suction Power

Strong turbines beneath the cleaner generate ample force providing exceptional cleaning climbing capabilities from a wheeled suction cleaner – allowing Baracuda® Wheela™ to clean and scrub the floor, walls, and waterline on all pool surfaces.

Energy Efficient

No need to run the pump at high speeds, the Wheela™ cleaner features a hydraulic design that works with low-flow and variable-speed pumps.

Pack Contains

1 x BARACUDA® Wheela™ cleaner body

10 x 1m lengths of Twist & Lock™ hoses, including the leader hose with float and Flow Regulator Valve

1 x AD Flow Valve

1 x 90 Degree Elbow
